

Printing zoomed areas of a PDF. (Works in a Saved_As Version)

To Print enlarged areas in a **PDF**.

Open the PDF

Choose the crop tool icon  and place a box around the area to zoom.

Double click inside the Box.

The crop pages dialog will appear with the chosen box designation in the crop margins preview box.

Pick: **OK**.

The enlarged area of the PDF will then be viewed.

If this is the desired image for printing, choose **File** and **Print**.

If the 'expand small pages to paper size' is not checked.

Check and

Pick: **OK**.

If this is not the desired zoom, or if printing is done and another zoomed area is desired, then choose **File: Revert**.

Pick: **Revert**

This will take you back to the original formatted **PDF** for more zooming, viewing and/or printing.

Note:

When closing this copy of the web PDF, make sure the file has been reverted, or, the cropped view will replace the original view.

If the cropped view is something you would like to save, then saves as and rename the file.
